

Project Title: Private House Extension, Helmsdale, Sutherland
Client: Mr + Mrs Cowie
Project Value: £100,000
Project Status: Construction works completed November 2002

Located in a remote part of the North of Scotland with stunning views from the site, the extension is sympathetic to the original building in scale and external treatment, however the interior spaces created, high quality materials and large glazed areas contribute to the modern aesthetic of the completed development.

The glazed gable and glazed double height entrance areas exploit the stunning views to the ocean from the first floor living room and ground floor dining room.
